

Add and Subtract Fractions

1. With a partner, play the game below.

Cut the spinners out and take it in turns to spin!
 Each spinner will give you a fraction.
 Add the two fractions together.
 A point is received for each correct answer.
 The person with the highest number of points after 10 spins is the winner.

Were some pairs easier to add together? Why?

2. Play the game with a partner. You need a different coloured pencil each. Choose two fractions to subtract. If the answer is less than one half, shade both boxes. The first person to travel from one side of the board (in any direction) to the other is the winner. You cannot choose fractions with the same denominator.
