

Looking Closely at Books – Cover Information KS1

Look closely at the front and back of some books. What information can you find, why has it been put there?

The diagram shows an open book with a central spine. The left side represents the front cover and the right side represents the back cover. The front cover is divided into four colored boxes: a light green box at the top, a large blue box in the middle, and two smaller boxes at the bottom, one purple and one orange. The spine is a narrow red box. The back cover is divided into two colored boxes: a purple box at the top and a large yellow box at the bottom.
