

Eid Lantern Paper Craft Instructions

You will need:

- Lantern template
- Scissors
- Glue

Key:

..... Fold Down

- - - - - Fold Up

Follow these instructions to make your own 3D paper lantern decoration to celebrate Eid and Ramadan!

1. First, cut out the template.
2. Fold the template in half along the middle dotted line. Use the key to help you to know which way to fold.
3. Next, cut each of the 11 parallel solid lines cutting up from the fold you have just made.
4. Now, using the guide to help you, fold the two long dotted and dashed lines up (fold one first, then turn the paper over to fold the other one).
5. Finally, fold the last two tabs down.

Now you are ready to add glue to assemble your lantern!

6. Pull the template open and add glue to the top of the two tabs.

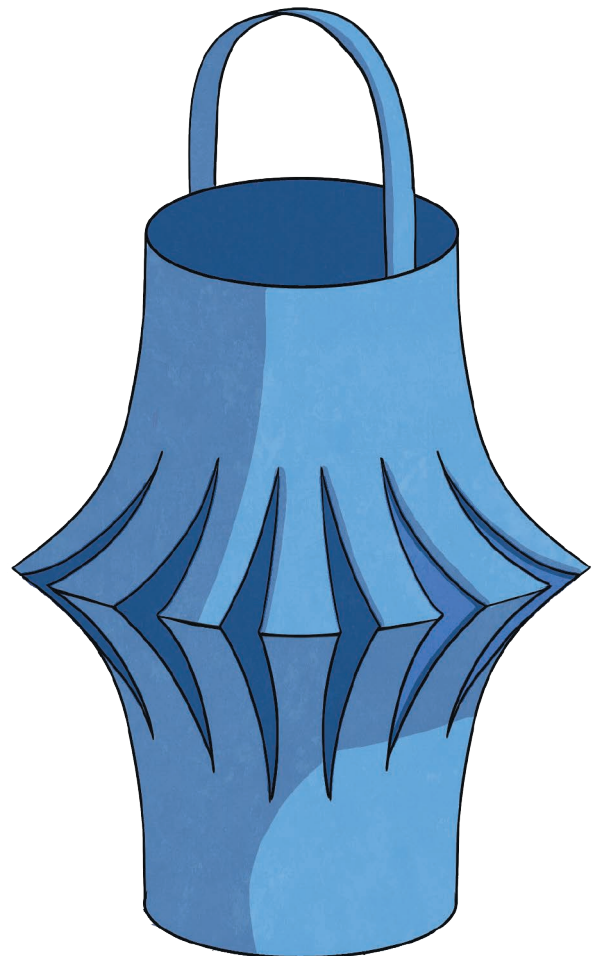

Eid Lantern Paper Craft Instructions

7. Curve the paper to make the tabs join on the other side and hold until the glue dries.
8. Pull your lantern apart slightly to make it taller.

Additionally, you may wish to add your own strip of paper to the top of your lantern as a handle for carrying or hanging.

If placed on a level surface, add an LED candle in the middle of your lantern and turn the lights down!

Eid Mubarak!
