

Here are the rules to your Maths starter -

Use the numbers above.

You can only use each number once.

You do not need to use all the numbers in each calculation.

You can add, take away, multiply or divide.

Try and complete the calculations in your head but you may also write out any methods to help you.

- What is the biggest number you can make?
- What is the smallest number you can make?
- What is the closest number you can make to 163?
